Our Members Story...

Before we were introduced to this business, we had spent many stressful years in retail management. We racked up our credit cards, re-mortgaged our house a few times and were living pay check to pay check. We both were working full time; often more than 40 hours a week; and we hardly ever seemed to have enough family time. We were tired of the long commute each day and wanted to take control over our lives. We have one daughter and we were worried about not being able to spend enough time at home raising our child.

We knew that if we were ever going to get out from under our mountain of debt, set our own hours, and take charge of our financial future, our best option was to build our own business based from our home. We are very goal-oriented and driven to excel so we decided to look in to other career opportunities. So about 2 years ago, we learned about this business opportunity ***My Three Billion Messages Daily*** and we decided to check it out.

With the help of our business coach, we earned an average of **\$3000 - \$4000** per month. Now we work our business around our family's schedule and our earnings continue to grow. We feel this business has exceeded our expectations and we live a much happier life now that we do not have to answer to a boss.

It took courage to step out of our comfort zone and look for a way out of the rat race. And we're so glad we did! We're now building a solid financial wall around our family and we look forward to our days of living a life that we hadn't ever dreamed possible.

So you've decided to pursue working at home. What now? Well, the first step is choosing what you want to do. This is probably the most important decision in determining whether you will be a success. You want to choose something that's profitable, in demand, and recession-proof, right? But it's more crucial to find something that you genuinely enjoy. Remember, working at home can be quite a challenge since

- 1.) you're usually starting from scratch,
- 2.) you aren't worried about being fired if you don't get out of bed, and
- 3.) it's so easy to give up or stop putting in effort.

But if you make the right choice, these difficulties will be easy to overcome. The right choice is something that you're extremely motivated about. But how many times in your life have you been obsessed and convinced about an idea only to completely forget about it a month later?

That's why this decision can be so intimidating. However, if you do your research, gradually limit your options, and spend plenty of time thinking and planning, you'll find the job for you! Time is key. Even after you've made a choice, leave plenty of time to plan before starting your business. If you have a set path and goals written out, you improve your chances even further!

Note: Check back frequently for updates! I will add more details and opportunities whenever I find them.

Note: Some well-known work at home opportunities are not listed here, such as stuffing envelopes and at-home assembly. This is due to the fact that there is so much fraud in these areas that I cannot recommend them. Please take extreme caution if you wish to become involved in these.
