The Ultimate Working From Home Data Entry?

What is Work From Home Data Entry?

In the last few years, **work from home data entry** has fast become the #1 work from home opportunity available on the internet, but **what is it exactly? How does it work? Is it legitimate?** This lens is dedicated to answering these questions and more.

Work From Home Data Entry

Work from home data entry is a great way to make money from home. You can become your own boss and work the hours that your want.

It is a legitimate opportunity as well. I have been a data entry operator for over a year now and am here to tell you that work from home data entry is a fabulous way to stay home with your kids and still add to your family's income

Data Entry Definitions

Program Discriptions

There are a lot of data entry packages available, and without any knowledge of the programs involved, it is hard to make a decision on which one you should choose.

Here I have listed the most popular data entry programs and explained how they work. I have also included a description of how you are paid.

Article Typing

What is it?

Article typing can be a very rewarding way to make money from home. You simply type articles and post them to the web. Your articles can be about any subject you can think of.

You can also make money from promoting affiliate products with your articles. This involves reviewing products and services offered on the web. This is a very good way to make money from home.

How are you paid?

You are paid by companies that need a fresh supply of content. You can also earn from adsense. This is where ads are placed with your articles and you earn money when someone clicks on the ads and/or makes a purchase.

If you choose to write articles promoting affiliate products, then you are paid a commission by the company you are promoting for whenever someone purchases the product.

Company I Recommend

If you are interested in writing articles, [Mass Articles Control](#) offers a fantastic article typing program that will teach you how to earn a generous income by posting short articles to the web. They provide a detailed tutorial to help you get started working from home.

MassArticleControl.com

Traditional Data Entry

What is it?

Traditional data entry involves performing typing services for companies that need a helping hand. You can earn a full time income for typing any number of projects for companies, including letters, forms, and more. This program can also include working as a customer service or [virtual call center](#) agent.

How are you paid?

With this program, you are paid directly by the companies that you work for. Usually this will be on an hourly or per-project basis. Traditional data entry can earn you a very generous income and will

allow you to start your own secretarial business from home.

Company I Recommend

[Work-From-Home Data-Entry](#) offers a wonderful package that includes traditional data entry. This package includes many other programs as well to earn you multiple streams of income.

Worldwide Data Entry

What is it?

Worldwide data entry is the most popular data entry program available. This is because this program requires no previous experience and the income potential is unlimited. This program works by typing ads for internet companies offering products and services to targeted customers. If you've seen ads on websites, then you'll know what I'm talking about. This is also known as affiliate marketing.

How are you paid?

With Worldwide data entry, you are paid whenever someone purchases a product through your ad. It is easy to make money with this program and the more ads you have, the more money you can potentially make.

Company I Recommend

For Worldwide Data Entry, I would recommend [My Data Team](#). This company offers an excellent worldwide data entry program. They provide a detailed tutorial that teaches you how to work this program successfully and earn a very generous income from home.

My Top Recommendation

If you are serious about working from home as a data entry operator, there is a fantastic data entry package that offers all of the programs I have listed above and more. I highly recommend the [Online Data Entry Jobs](#) package offered by Laura Kauth. Online Data Entry Jobs combines eight data entry programs into one membership that will teach you to work from home in your own data entry business.

Important Note Regarding Worldwide Data Entry

T

he only downside to Worldwide data entry is that there are advertising costs involved. It works on a pay-per-click basis, which means that you pay a few cents for everyone that clicks on your ads whether they make a purchase or not. The good news is that you set the click rate. So, you can decide how much you are willing to pay for click. Of course, the higher you set the click rate, the more advertising exposure your ads will receive.

My advice on this program is to go in with your eyes open. If you understand the concept of spending money to make money, then this will be a good data entry program for you. If you would rather not have out-of-pocket expenses, I would suggest that you start with either Article Typing or Traditional data entry programs, since neither of those programs requires you to spend any additional money.

After stating that, I should also tell you that there are free methods that you can use with worldwide data entry and most data entry programs that offer this program will show you how to make money without additional costs.

How To Find A Legitimate Work From Home Data Entry

Work From Home Data Entry

There are many companies that are willing to pay you for your time and services as a data entry operator via the Internet. Work from home data entry is a legitimate way to earn money online and working for these companies will allow you to start your own data entry business from home.

This lens is designed to help find a legitimate data entry package that you can use to work from home. I have listed criteria you should look for, and important factors you need to know to get stated. Additionally, I have reviewed two legitimate paid online survey sites that can also bring you extra money from home. You'll also find links to review sites and legitimate data entry packages that I have personally reviewed.

Work From Home Data Entry Packages

Most data entry packages currently available on the Internet offer Worldwide (or Global) data entry, which is typing 3 - 5 line ads for Internet companies. These companies will pay you a commission when someone clicks on your ad and purchases the product. This type of data entry is akin to affiliate marketing.

What many people may not know is that there are work from home data entry packages which will also include additional data entry programs such as article typing, data collection, marketing (or home) typist positions, and more. If marketing is not your cup of tea, the best data entry packages will also offer Traditional data entry programs that you can do from the comfort of your home as well.

Traditional data entry programs can really get your data entry business started. There are many businesses that do not have enough employees to cover their workload, so they are willing to outsource their additional work to individuals working from home. Assignments can vary from basic data entry, data proofreading, word processing, transcription, virtual call center agents, and much more.

As you can see, there are many types of work from home data entry programs available. These programs will allow you to work from home and earn a generous income, but how do you find a legitimate work from home data entry package? This lens strives to answer that question by showing you the important factors you should look for.

How Do I Find A Legitimate Data Entry Package?"

The best way to get started in data entry from home is to find a legitimate package that offers multiple programs like the ones I have listed above. This way, you can pick and choose which programs that you want to work and have the ability to draw an income from multiple sources.

When searching for a work from home data entry package, you should look for one that meets your needs and is a legitimate opportunity. I have listed three very important details you should look for.

Important factors you should consider

1. Does the package offer complete training for each of their programs?

You will need training for each of the programs offered so that you will know how to work them successfully. Any data entry package you consider should offer detailed training at no additional cost.

2. Is their membership site or data base constantly updated?

You do not want a package that is only offering an e-book or an outdated list of companies that you can type for. Be sure that they either offer a constantly updated database or membership to their site. This will ensure that you have the latest information, tools, and resources you will need.

3. Do they offer a money back guarantee?

This is the most important detail you should look for. Any data entry package you purchase should have an iron clad satisfaction guarantee. This way you can order the package and see how the programs work. With a money back guarantee, you can be assured that your money will be returned

if you are not satisfied with the package.

Criteria Summary

What You Should Look For In A Data Entry Package

Multiple Programs
Training provided
Fresh Database
Money Back Guarantee

Work From Home Data Entry Review Sites

Browsing review sites is an excellent way to find legitimate work from home opportunities. Review sites do just that. They review all type of work from home programs by testing them out for themselves. They then report their findings so that consumers will be aware of which programs are legitimate.

The list below includes several review sites that have reviewed work from home data entry packages. They have each listed the data entry packages that they found to be legitimate opportunities.

Work From Home Data Entry Packages Reviewed

[Best Rated Reviews](#)

"We listed easy, legitimate, and 100% guaranteed information for people wanting to become work from home data entry professionals. Our extensive research has come up with this list of scam - free recommended work at home opportunities.

- \$57.00 one time only fee
- 30 day review with a money back guarantee

"Why Are These Packages Asking Me To Pay For A Job?"

An important factor that you should understand is that when a work from home data entry package charges a fee, they are not asking you to pay for a job. These companies have put together a huge database of information to get you started working in your own home based data entry business. They are not supplying you with employment.

As a data entry operator, you will be an independent agent. You will not have an employer or a set schedule. You set your hours and work the programs that you want. A data entry package simply provides you with everything you need to start your own data entry business from home.

The fee that is charged is to cover their time and expense in setting up their database and membership site. You must also consider that they are providing resources and training as part of their package as well. It only makes sense that they charge a small fee for their services.

Paid Online Surveys

Another way to make money from home in data entry is through Paid Surveys. You simply fill out short online forms based on your opinions and there are many companies willing to pay you for this service. Online Paid Surveys is a fun and easy way to earn additional cash every month.

I've listed two of the best paid survey companies below. Each of these companies meet the criteria I listed above:

*Multiple programs
Training provided
Database constantly updated
Money back guarantee*

These packages offer the best list of companies you can do surveys for and they have the highest paying companies listed for you as well.

Legitimate Paid Survey Packages

Maximum Paid Surveys

[Maximum Paid Surveys](#) offers a huge database of over 750 companies that are willing to pay you to collect data and take short surveys for them

Survey Scout

[Survey Scout](#) offers a comprehensive Paid Survey package. Their programs include many "paid to" programs, such as paid to take surveys, paid to shop, paid to drive, paid to read, paid to eat, paid to watch, and even paid to play games.

Article Summary

There are legitimate work from home data entry packages out there and I have listed information

that will help you to avoid being scammed. Just take it slow, do your homework, and watch out for the criteria that I have listed for you. Follow these steps and you will be able to find the perfect work from home data entry package for you. I wish you the best of luck.
